Gentlemen:

I am writing in response to the failure to renew my dumping license. I ask that I be permitted a hearing to have the permit renewed.

A short bit of history might be advisable for the record. In 1967 George Mowrey of the City Health Department approved my dump and told me that as long as Treasure Island dump, who had been dumping for 20 years on part of the site of my dump and adjacent to it, had not had the paper streets vacated, that I would not have to do so as well. I have been dumping on the site since 1968 and the City never raised objections to my dumping on the paper streets until the present time. Therefore under the Grandfather Clause I should be permitted to continue. I have run a respectable dump site; all agree that it is so run; I have had only 2 fires in 7 years; I cooperate 100% with the Fire Dept; I furnish dozers, loaders and cranes within two hours after request by the Fire Dept; Chief Zimmerman told me my company was the only dump operator to do so and has complimented my firm on it's operation.

Further, I have a substantial investment in the dump and have entered into contracts for demolition work based on using my dump. If I have to use other dumping facilities it will cost five to six thousand dollars additional expense which is a tremendous financial loss.

Further, I am able to use my dump without dumping on the so called paper streets.

I wish to cooperate in running a respectable dump so please re-consider and issue the renewal permit as you have in the past years. Thank you.

Very truly yours,

Sam H. Tuber
